Education

Vellore Institute of Technology

Bachelor of Information Technology — CGPA: 7.3

Vellore

2023 – 2027

Riverside Public School

Grade X- 78 percent — Grade XII- 78 percent

Kotagiri

SUMMARY

- Enthusiastic B.Tech Information Technology student with interests in Database Systems, Machine Learning, Artificial Intelligence, and Blockchain. Skilled in scalable application development and AI-driven solutions. Completed a one-month internship in Python Application Development at I-Net Secure Labs Pvt Ltd. (June 2026).

Experience

I-Net Secure Labs Pvt. Ltd.

Internship Training in Python Application Development

Chennai

Jun 2026

- Successfully completed internship training from 01-06-2026 to 30-06-2026.
- Gained valuable practical knowledge through the Tech Team during the internship training.

Projects

Online Auction Platform | React.js, Node.js, Express.js, MongoDB

- Built a full-stack online auction platform using React.js for the frontend and Node.js with Express.js for backend services with MongoDB as the database.
- Integrated JWT-based authentication to manage user login, authorization, and secure session handling.
- Implemented live bidding functionality allowing users to place competitive bids with automatic price updates.
- Designed RESTful APIs to enable efficient communication between frontend and backend components.

Mining on Public Speeches (Machine Learning / NLP) | Python, TextBlob, VADER, SBERT, Scikit-learn, Matplotlib

- Developed an NLP-based system to analyze sentiment and emotional tone from more than 1400 public speeches.
- Applied TextBlob and VADER for sentiment polarity detection and detailed sentiment classification.
- Used Sentence-BERT embeddings to perform semantic clustering and identify key thematic patterns in speeches.
- Conducted trend analysis and visualization to extract insights from large-scale textual data.

Password Manager with Multi-Factor Authentication | Python, AES-256, SHA-256, TOTP, TLS, MongoDB

- Created a secure password manager to store and manage user credentials in an encrypted environment.
- Implemented AES-256 encryption for protecting stored passwords and SHA-256 hashing for ensuring data integrity.
- Integrated TOTP-based multi-factor authentication to strengthen account protection and login security.
- Enabled secure data transmission using TLS to prevent unauthorized access and cyber threats.

Technical Skills

Languages: Java, Python, C/C++, SQL (Postgres), JavaScript, HTML/CSS, R

Frameworks: React, Node.js, Flask, JUnit, WordPress, Material-UI, FastAPI

Developer Tools: Git, Docker, TravisCI, Google Cloud Platform, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse

Libraries: pandas, NumPy, Matplotlib
